## 1500+ Tossups for Aspiring Champions

In 2017 Brazilian plastic surgeon Edmar Maciel investigated the efficacy of using skin from this organism to heal burn victims. On Gardiner's list, K1 is the designation for the hieroglyph of this animal symbolizing rebirth and associated with Hathor. Common commercial species of this animal are the Mozambique, Blue, and Nile, and though the Bible does not specifically mention this (\*) cichlid, it is traditionally considered to be the type that Peter found with a coin in its mouth, hence its alternative name, St. Peter's Fish. For 10 points -- name this mild fish, one of the most popularly eaten in the United States along with pollock, cod, and catfish.

Answer: Tilapia

## Book II: Questions for the Rising Star

### Table of Contents

- |                      |                             |                           |
